Software Engineer

SUMMARY

Software Engineer and Computer Science graduate with experience building and operating production-ready web applications. Skilled in React, Java, TypeScript, Node.js, Python, and SQL, with experience designing APIs, data ingestion pipelines, and automation workflows. Comfortable owning features end-to-end, collaborating across teams, and delivering maintainable software in production environments.

EDUCATION

NJIT - New Jersey Institute of Technology, Newark, NJ — May 2025

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C++, Bash
Frameworks & Libraries: React, Node.js, Flask, Express, Next.js, Tailwind CSS
Databases & Tools: PostgreSQL, MongoDB, Supabase, Git, Docker, Linux, Tableau, Excel
Concepts: REST APIs, Data Modeling, Authentication (JWT/OAuth), API Integration, System Design Fundamentals

PROJECTS

- **GiftPerch (giftperch.com) — AI-Powered Gifting Workspace | Full Stack Developer | Fall 2025**
  - Built a Next.js + Supabase platform generating personalized gift recommendations from reusable recipient profiles.
  - Designed REST APIs and database schemas to manage users, profiles, budgets, and gift history.
  - Implemented feedback loops (saved, liked, disliked items) to improve future recommendations and avoid repeats.
  - Delivered a responsive dashboard, occasions calendar, and PerchPal chat workflow with production-ready UI components.
- **Applictus (applictus.com) — Automated Job Application Tracker | Full-Stack Developer | Winter 2026**
  - Built a production web application that integrates with Gmail via OAuth to automatically detect, classify, and track job application updates.
  - Designed and implemented an email ingestion pipeline to parse messages, deduplicate events, and infer application lifecycle states.
  - Implemented secure authentication, session management, and encrypted OAuth token handling using Supabase and Google OAuth.
  - Delivered a responsive dashboard with application pipelines, timelines, sync status, and user-managed account integrations.
- **StateStats (statestats.us) — U.S. State-Level Data Explorer | Full Stack Developer | Fall 2025**
  - Built an interactive data platform visualizing state-level economic and workforce metrics with choropleth maps and time-series charts.
  - Designed a Prisma + PostgreSQL ingestion pipeline enabling efficient querying and cross-state, time-based comparisons.
  - Implemented dynamic visualizations with D3.js and responsive UI components using Next.js, React, and Tailwind.
  - Deployed a production-ready analytics dashboard with clean UX for filtering, comparisons, and metric drill-downs.

EXPERIENCE

Frontend Developer — Jan 2025 - May 2025

MicoByte Software — Kanji Gator (Japanese Learning Platform) — Newark, NJ

- Developed frontend features for a Japanese language learning platform, implementing interactive kanji input workflows with real-time feedback.
- Built responsive UI components using **React and Tailwind CSS**, focusing on usability, input handling, and smooth user interactions.
- Integrated frontend functionality with **Flask-based APIs** to support session state, user input processing, and progress tracking.
- Collaborated within an 11-person engineering team using Git workflows, contributing to feature development, code integration, and cross-functional coordination across frontend and backend components in a shared codebase.

Operations & Logistics Assistant — May 2023 - Jan 2025

Good Tidings Plumbing Heating Cooling — Clark, NJ

- Coordinated daily logistics for an 8-person warehouse team, ensuring materials and equipment met scheduled project demands.
- Maintained and audited digital inventory systems for real-time tracking and error reduction.
- Used spreadsheets and internal tracking tools to manage workflows, improving team communication and efficiency.

ACTIVITIES

- **Volunteer Tutor — NJIT Coding & Tech Tutoring | Spring 2023**
  - Tutored students in Python, Java, and C++, focusing on debugging, algorithms, and software design fundamentals.
- **Member — NJIT Information & Cybersecurity Club | 2022-2023**
  - Completed applied security and ethical-hacking labs, including CTF challenges focused on network defense and vulnerability testing.
